

KRAFT WRAPPING PAPER - ROLLS

Acorn Paper Products carries an extensive line of wrapping and protective papers for cushioning, shielding and military grade requirements. If you do not see what you need listed here, please contact your Acorn Paper Products representative for assistance.

Machine finished natural kraft paper has exceptional strengths with pliability. It is manufactured in uniformly wound rolls in an approximate diameter of 9". While standard widths from 6" to 72" are stock, sizes up to 108" are available upon request. Kraft wrapping is great as a cover wrap, for unitizing, bundling or as dunnage.

FLEXIBLE CROSS-SCORED, 250'

Cross-scored Single Face corrugated provides a flexible alternative to regular single face. It will roll or fold around items in both directions for added tightness. Saves time and material. Available in rolls or sheets. Your Acorn Paper Product representative will be happy to provide information on roll and sheet sizes that are available.

COHESIVE SINGLE FACE CORRUGATED ROLLS

Increase your labor savings and reduce your sealing costs with self-sealing cohesive single face corrugated. Cohesive material sticks to itself, but not the product inside. Provides a convenient and quick way to wrap and secure an item. Please contact your Acorn Paper Product representative for information on custom roll sizes and sheeted material.

MILITARY SPECIFICATION BARRIER MATERIAL

Acorn Paper Products can provide a wide variety of military specification papers for many highly critical applications. Contact your Acorn Paper Product representative for information on protective papers for your specific application. Our line of military specification papers include the following:

MIL-B-81705C Electrostatic Discharge Barrier Material

Metalized Polyester barrier material is heat-sealable. It is Electro-static free with low water and vapor transmission. It is also Greaseproof and Waterproof. Use to prevent the build-up or retention of an electrostatic charge under any atmospheric condition used to preclude ignition of stray, flammable materials by electrostatic sparks. Available in Type 1 and Type B variations.

MIL-B-121 Poly Kraft Wrap, Grade A

Natural Kraft / Polyethylene coated construction. Greaseproof, Waterproof, Acid-free, Non-corrosive. Heat-sealable. For use where a Vapor Barrier is not required.

MIL-B-121, Grade C, Wax Coated Barrier Wrap

Features 1 or 2 side of scrim / microwax. Self-adhering coating. Available in medium to heavy-duty grades.

Non Mil-Spec Wax Coated Barrier Wrap

Use for industrial usage where a military specification is not required. Wax coating is self-adherent, allowing material to be fastened securely around a variety of items. For greaseproof protection and cushioning of metals. Available with wax on one side or both sides.

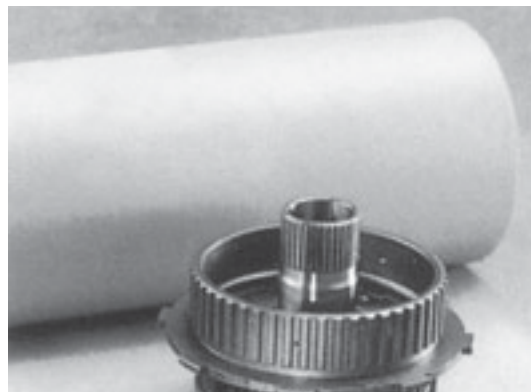

MIL-B-131 Waterproof Barrier Wrap

Available in Class 1, Class 2 and Class 3. Medium to heavy-duty material provides a greaseproof, waterproof and vaporproof barrier material. Heat-sealable for ease of use. Can be used where a vapor barrier is required.

MIL-B-22191 Barrier Film

Type 1. Available with Polyester, Polyethylene and Aclar. Heat-sealable for ease of use. Can be used for protection of critical or delicate items susceptible to corrosion. Transparent, low water and vapor transmission, greaseproof and waterproof barrier material. Also available in Type 2.

Other Military Grade Wraps and Films are Available

RUST AND CORROSION (VCI) PREVENTIVE PAPERS

Volatile Corrosive Inhibitor (VCI) and Rust Preventative Papers are specifically formulated to prevent metal corrosion. It is available for both ferrous and non-ferrous metals and can be ordered in both sheets and rolls. Also available to meet MIL B 3420 specification. Contact your Acorn Paper Product representative for more information.

NEWSPRINT

Newsprint is a clean cost-effective alternative to other void-fills and for interleaving. Available in sheets, counter rolls and tied bundles. Contact your Acorn Paper Product representative for information on custom roll and sheeted material.

FINE WOOD EXCELSIOR

Excelsior wood fiber products are used in diverse markets and applications including protection and cushioning of larger, heavier, or more irregularly shaped products such as parts or statuary products. The unique, curled excelsior fibers have a barbing feature which enables the fibers to interlock which provides excellent packing and cushioning capabilities not found with other types of packaging materials. Excelsior is 100% biodegradable, safe and easy to work with.
